

# M6 Countermeasure Discharger

## Description:

The M6 is a 4-tube smoke grenade launcher that will enable combat vehicles to conceal themselves from threat surveillance, target acquisition, and weapon guidance systems. It is a 2x2 tube design weighing 8.5 lbs.

## Background:

The M6 provides all-around screening protection and has the ability to interface with Vehicle Integrated Defense Systems. The M6 is capable of firing all Q-STAG 401 conforming grenades. It is capable of single tube inventory and single tube firing when integrated with Vehicle Integrated Defense Systems.

## Characteristics:

- 66 mm Grenade Compatible
- Single Tube Inventory and Firing
- Integrate with Vehicle Integrated Defense Systems

## Status:

The M6 discharger is currently in production.
